Dr. J. Schutten, Managing Director of the Netherlands National Institute for Nuclear Physics and High Energy Physics (NIKHEF) at Amsterdam, died on 10 March. For ten years he was Technical Director of the Institute for Nuclear Physics Research (IKO), and in 1981 became Managing Director of NIKHEF, which now includes IKO. He personified the bond between the two sections of the Institute — Nuclear Physics (K) and High Energy Physics (H). He is sadly missed by his colleagues.
